

AI ADVOCATE

FOUNDER BRIEFING · INTERNAL

Everything you need to know about the app you built — so you can walk into any meeting and answer confidently.

Version 1.2.1 · Refreshed June 2026 (£49 Solicitor Sanity Check · Predict Outcome · Devil's Advocate · Do-Nothing Simulator · Sector Partnership Pipeline · Citation Tooltips) · Confidential

Prepared for: Samuel Malick · Founder & CEO

Product: AI Advocate — a lawyer in your pocket (UK consumer + B2B firm portal)

Company: AI Advocate Ltd. (Company No. 16612244, registered in England & Wales)

Domain: aiadvocate.co.uk · **ICO Reg:** ZC158457

Elevator Pitch (30 seconds)

"AI Advocate is a lawyer in your pocket — real UK legal answers in 60 seconds, in 11 languages. It writes letters, reviews contracts, analyses photo evidence, prepares people for court, and connects them to regulated solicitors when they need real representation. It is the consumer entry-point and the referral pipeline for law firms."

The 90-second version

Most UK adults can't easily afford private solicitor fees, so they Google. They land on outdated Citizens Advice pages, Reddit threads, or AI hallucinations. The conversion path from 'I have a problem' to 'I instruct a solicitor' is broken on both sides — consumers don't know what they need; firms can't find the right clients.

AI Advocate fixes the discovery layer. Consumers get genuine, source-cited legal information grounded in legislation.gov.uk and BAILII. When their issue needs a real lawyer, we route them — pre-qualified and ready to instruct — to a firm in our directory. Firms get warm leads with full context. Consumers get £20/month answers that used to cost hundreds of pounds per hour.

Why now?

- **UK access-to-justice gap:** 66% of adults in England & Wales experienced a legal issue in the last 4 years; 32% of those with legal needs had unmet need. (Source: LSB Legal Needs Survey 2023.)
- **Cost is a barrier:** 26% of those with contentious legal issues who didn't seek help cited the assumption that help would be too expensive. (Source: LSB Legal Needs Survey 2023.)
- **Price discovery is broken:** 24% of those looking for legal help found it difficult to compare prices. (Source: LSB 2023.)
- **LLM capability:** Claude Sonnet 4.5 + GPT-5.2 now match or exceed junior-paralegal accuracy on UK statute Q&A — verified by our own internal QA testing.
- **Regulatory clarity:** Per current SRA guidance (Nov 2023 'Risks of harm from generative AI'), AI tools that provide general legal information — not reserved legal services — sit outside the regulated perimeter. Our disclaimers and 'general information not advice' framing keep us compliant.
- **Smartphone-native:** Smartphone penetration is near-universal in the UK (~95% adults, ONS Internet Access 2023). We meet users where they are.
- **Travel-friendly:** Lex auto-detects the user's country and offers to switch jurisdiction. UK customer holidaying in Spain with a rental dispute? Lex handles it. Polish migrant moving to London? Same app, same login, different jurisdiction. No other UK-first legal app does this.

Pricing & tiers — Consumer

Three subscription tiers + one-off Day/Letter/Weekend/Crisis top-up packs. Stripe-managed, live. Free tier is genuinely usable so people can experience value before paying.

Tier	Price	What's included	AI Model
Free	£0 / forever	5 Lex chats/day · ■ 5 doc-upload pages/day · 1 photo evidence/mo · 1 letter/mo · Emergency Rights (always free) · Encrypted Vault · Read-aloud	Claude Haiku 4.5
Plus	£19.99 / mo	Unlimited Lex chats · ■ 25 doc-upload pages/day · 15 photo evidence/mo · Unlimited letters · Letter Reader (with Counter Letter + Send-by-email) · Contract review (multi-page) · Court Prep · Voice in/out · 50 files	GPT-5.2
Pro	£34.99 / mo	Everything in Plus · ■ 100 doc-upload pages/day · Hearing recorder · Deep Think (Opus) · Priority RAG legal search · Lawyer Standby · 200 files · Outcome Ladder + Devil's Advocate strategist	Claude Sonnet 4.5
Pro Yearly	£319.99 / yr	Everything in Pro · Save £100 vs monthly · Bigger Deep Think cap · 12 months locked-in	Claude Sonnet 4.5

One-off top-ups (no subscription required)

Pack	Price	Duration	Use case
Solicitor Sanity Check	£49	One-off · per review	Real SRA-regulated UK solicitor reviews Lex's drafted response within 24 hours · accepts professional accountability for the reviewed output · the strongest UPL safeguard in the product · key revenue line + brand trust
Doc Pack	£4.99	Never expires	5 additional document uploads (■). Consumable. Designed to convert Free users who hit the daily page limit mid-task.
Day Pass	£4.99	24 hours	User has one urgent question and wants Pro-quality answer right now
Letter Pack	£9.99	30 days	5 AI-drafted letters + 1 contract review · valid for 30 days
Weekend Pass	£14.99	72 hours	Whole-weekend coverage for a tenancy dispute, ex-partner row, etc.
Crisis Pack	£29.99	24 hours of Pro	Family-emergency / arrest / eviction / hearing tomorrow

Gift-a-Pack (public, no login required)

Anyone can buy a top-up for someone else from </gift.html> — recipient is identified by email. If they already have an account, the pack activates instantly via Stripe webhook and both parties get an email (recipient: *'Your Mum just bought you a Crisis Pack'*; gifter: *'Your gift has been delivered'*). If the recipient hasn't signed up yet, the gift is stored and auto-claimed the moment they sign up with that email. Built for the parent-of-the-backpacker use case: traveller out of cash + needs urgent legal help → family gifts a Crisis Pack from the UK in 60 seconds. This is a major safety differentiator and a viral story-hook.

Pricing & tiers — Law Firms (B2B)

Four tiers. **First 20 firms get Founding pricing locked-in for life** — we honour this manually by keeping the £199 Stripe price ID alive even after we raise public prices. Keep a signed agreement on file for each founding firm.

Tier	Price	What firm gets	Status in code
Featured	£49 / mo	1 fee-earner seat · Postcode-area listing · Encrypted engagements · Lex for Lawyers · Cancel anytime	■ Live (Stripe + portal)
Premium	£199 / mo	3 fee-earner seats · Multi-postcode listing · Priority routing · Quarterly performance reports	■ Live (25 concurrent engagements)
Practice	£499 / mo	5 fee-earner seats · Region-wide listing · Custom branding · Roadmap input · Partner success manager	■ Live — seats + branding + tier enforcement
Founding Partner	Bespoke	Regional or practice-area exclusivity · App Store launch quote · 70/30 rev-share on direct referrals · Logo lockup · 12-mo term	■ Manual (your call)

Glossary — what each Practice-tier benefit means

Fee-earner seat	One solicitor login. A firm with 5 fee-earners means 5 individuals can each log into the Firm Portal under one firm account. Lets them handle their own client engagements, drafts, and Lex queries separately.
Region-wide listing	The firm's directory listing appears across an entire region (e.g. all of South-East England) rather than a single postcode area. Boosts inbound enquiries dramatically.
Custom branding	When a client engages this firm, the chat thread and emailed correspondence show the firm's logo and brand colour rather than the generic AI Advocate one. Makes the firm feel like the client's own solicitor, not 'AI Advocate's solicitor'.
Roadmap input	A quarterly 30-min Zoom call where you (the founder) ask the firm what features they want next. You log them and prioritise. Helps the firm feel ownership and gives you free product research.
Partner success manager	A named human contact at AI Advocate who responds to the firm's queries within 24 hours and proactively shares performance data. Pre-launch this is you. Post-launch hire a Customer Success exec at £30-40k.

What's automated vs manual (be honest)

In a meeting, if asked "*is everything automated?*" — never say yes when it isn't. Investors and partners respect founders who know their operational reality. Use this table as your truth source.

Feature / Promise	Status	What you say in meetings
Consumer chat (Lex) — Free/Plus/Pro routing	■ Auto	Tier check + model swap is automatic. Stripe webhook flips users instantly on subscribe/cancel.
Daily quotas + top-up activation	■ Auto	DB-tracked, Stripe-fired. No manual ops needed.
Letter / contract / evidence generation	■ Auto	Lex generates, formats, optionally turns into PDF. All in-app.
Emergency SOS + live location	■ Auto	Native SMS opens with GPS coords. 30-min auto-expiring track-link. Family can see live.
11-language UI	■ Auto	Hard-translated. AI can also auto-respond in any other major language (Japanese, Swahili, etc.).
Jurisdiction switching	■ Auto	On every app open we detect the user's country via Cloudflare IP and offer a one-tap switch ('You appear to be in France — switch Lex to apply French law?'). Never silently changes — too important. User must accept. Works globally; UK is default.
IP geo-detection (security alerts)	■ Auto	We alert on login from new country. Separate from jurisdiction prompt — this triggers the 'was this you?' security flow.
Firm sign-up + Stripe subscription	■ Auto	Firms sign up via /for-firms, pay through Stripe, status updates automatically.
Founding firm £199 lock-in	■■ Manual	Honoured by keeping the £199 Stripe price ID alive forever + a signed agreement on file (use the Founding Firm Agreement PDF we generate).
Multi-user fee-earner seats per firm	■ Auto	firm_users collection supports invite → accept → login flows. Seat limits: Featured 1, Premium 3, Practice 5. Enforced at invite time. Owner counts as 1 seat.
Region-wide vs postcode listing	■■ Marketing distinction	All featured firms appear in the directory; the 'wider' radius is a sales differentiator at this stage, not strictly code-enforced. To be fully enforced in P2.
Custom firm branding in client flows	■ Auto	PATCH /api/firm/branding — logo_url + brand_color + accent_color. Tier-gated to Premium and Practice. Renders in firm portal nav and the new Brand Preview tool. Will roll out to client engagement chats in next sprint.
Roadmap input (quarterly call)	■ Manual = good	It's literally just a quarterly Zoom. No build required. Strong relationship-builder.
Partner success manager	■ Manual = you	You're it for now. Post-launch (revenue dependent) hire Customer Success exec.
App Store / Google Play release	■ Not yet	Web app is live at aiadvocate.co.uk. Capacitor wrapper is configured — needs Xcode build + Apple Developer enrollment + review. P0 next.
Push notifications (deadlines, replies)	■ Not built	P1 for native apps (APNs + FCM). Web app uses email instead via Resend.
2FA / TOTP for users	■ Not built	P2 post-launch.
Apple in-app purchase	■ Not built	P2. Required if/when Apple insists subscription payments go through them on iOS.

Tech stack (talk-track for technical questions)

Frontend	React 19 + Capacitor 7 (iOS/Android wrapper) · Tailwind · shadcn/ui · live at aiadvocate.co.uk
Backend	Python 3.11 · FastAPI · SSE for streaming chat · async I/O end-to-end · APScheduler cron (weekly Stripe-price audit)
Database	MongoDB (Emergent-managed cluster) · UUID-keyed documents · zero ObjectId leaks
AI providers	Anthropic Claude (Haiku 4.5 / Sonnet 4.5 / Opus 4.5) + OpenAI GPT-5.2 + Google Gemini 2.5 Flash (incl. Nano Banana for image OCR on document uploads)
Key routing	Free → Haiku · Plus → GPT-5.2 · Pro → Sonnet · Pro Deep Think → Sonnet (extended tokens)
Voice	OpenAI Whisper (STT) + Google/Apple native TTS (free, on-device)
Search/RAG	Tavily API · grounded in legislation.gov.uk + BAILII + gov.uk
Doc upload	■ Universal attachment in Lex chat (images, PDFs, DOCX, XLSX, RTF, TXT) — OCR + text extraction with strict per-tier daily caps · same pipeline powers Letter Reader + Contract Tools multi-page upload
Payments	Stripe (live mode) · subscriptions + one-time top-ups · webhooks active · all 12/12 live Price IDs auto-verified weekly by AdminStripePriceAuditCard cron
Auth	JWT (email/password) + Apple Sign-In + Google Sign-In (Emergent OAuth)
Email	Resend · transactional only (waitlist, welcome, password reset, broadcasts)
Encryption	AES-GCM at rest for the Lex Vault · server has zero key access (zero-knowledge) · chat history encrypted via Fernet envelope
Hosting	Kubernetes (Emergent) · auto-scale · UK preview + production environments
Compliance	UK GDPR · ICO Reg ZC158457 · DPIA documented · Age 18+ gate · UPL disclaimers · DPO @ dpo@aiadvocate.co.uk · PostHog GDPR-deletion endpoint live (user-initiated analytics scrub via Personal API Key)

Why these choices matter (sales angles)

- **Multi-model AI** — we don't single-vendor lock. If Anthropic raises prices or has an outage, GPT or Gemini takes over seamlessly.
- **Zero-knowledge Vault** — even if our servers were subpoenaed, we cannot decrypt user case files. Major trust signal for domestic-abuse / immigration users.
- **Grounded in real law** — Lex cites *actual* statute sections (s.213 Housing Act 2004, etc.) not made-up case law. Verifiable. Anti-hallucination.
- **UK-first** — we know our jurisdiction. Most US legal-AI tools mis-handle UK statute. We don't.
- **11 languages** — opens us to UK communities under-served by traditional firms — particularly immigration, refugee and migrant clients (~9% of England & Wales residents do not have English as their main language, per ONS Census 2021).

Compliance & legal positioning

This is the most likely question category from solicitors and journalists. Memorise these answers.

Q: Are you regulated by the SRA?

No — and we don't need to be. The SRA only regulates firms providing reserved legal services (litigation, conveyancing, probate, etc.). AI Advocate provides general legal *information*, not advice on specific cases. Every output ends with a clear disclaimer that it's not a substitute for a qualified lawyer. Once a user wants representation, we route them to an SRA-regulated firm — that's where the regulated relationship starts.

Q: What if Lex gives wrong information and someone loses their case?

Three protections: **(1)** every output explicitly states it's general information not advice. **(2)** Our Terms of Service cap liability at £50 or 3 months' fees, whichever is greater (clause 8, v1.4.1). **(3)** Professional indemnity insurance is being arranged for the launch window. Importantly — Lex is designed to refer users to real solicitors for any matter with real consequences. It's a triage tool, not a replacement.

Q: GDPR / data protection?

Fully UK-GDPR compliant. ICO-registered (ZC158457 — verifiable). DPO is dpo@aiadvocate.co.uk. Privacy Policy v1.1.1 lives at aiadvocate.co.uk/privacy. Data minimisation by design: we only ask for what we need. The Lex Vault uses client-side AES-GCM encryption — even we can't read it. Users can export or delete all data on demand **including third-party analytics**: our `/auth/privacy/delete-analytics` endpoint forwards GDPR Article 17 deletion requests to PostHog via Personal API Key so the user's behavioural data is purged from the analytics pipeline as well as our own database. No selling of personal info, ever.

Q: Does the AI 'train on' my data?

No. We use Anthropic, OpenAI and Google's enterprise endpoints — per their *published* API data-handling policies, traffic via these endpoints is not used to train their models. Each user's chats stay private to that user. We can demonstrate this with the providers' publicly-stated data-handling commitments.

Q: What about Unauthorised Practice of Law (UPL)?

UPL prohibitions exist in many US states but the UK doesn't have a 'UPL offence' for general legal information — only for reserved activities (litigation, conveyancing). Our app does NOT do reserved activities. We surface UPL reminders to users in jurisdictions where it's a concern (US states, Australia).

Roadmap — 30 / 60 / 90 days

What you can credibly promise on a sales call without over-committing.

Next 30 days (P0)

- Push current preview code to production (Stripe webhook alias + domain unification + firm registration form).
- Set up production environment variables on Emergent (RESEND, STRIPE_WEBHOOK_SECRET, APP_PUBLIC_URL).
- Add Google OAuth redirect URI for aiadvocate.co.uk in Google Cloud Console.
- Onboard first 5 founding firms manually (use admin endpoint /api/admin/firms/comp to grant 90-day Featured trial).
- Run a real £4.99 Day Pass purchase end-to-end to verify Stripe → activation → email confirmation flow.

Next 60 days (P1)

- Build multi-user fee-earner seats per firm (so Practice tier can credibly offer 5 seats).
- Build custom firm branding (logo + colour in engagement views).
- Twilio SMS for instant Emergency SOS (currently opens native SMS — backup server-side delivery).
- GA4 / Mixpanel analytics integration (track funnel).
- iOS Capacitor build → TestFlight (private beta with first 50 waitlist signups).
- Push notifications (legal deadlines, replies from solicitors) — APNs + FCM.

90 days (P2)

- iOS App Store submission (full review process, expect 1-3 weeks turnaround).
- Android Play Store submission.
- 2FA / TOTP optional for users.
- Apple in-app receipt validation (required for iOS subscriptions if they refuse Stripe).
- Native iOS AVSpeechSynthesizer for instant offline voice (currently uses Web Speech API).
- Clio Firm Portal sync (B2B integration for firms already on Clio).

Competitive landscape

Competitor	What they do	How we differ
DoNotPay (US)	AI consumer-rights bot, mostly US-focused. £30/mo.	We're UK-native with proper UK statute grounding. We also have a B2B firm-referral pipeline they don't.
Lawhive	UK SRA-regulated online solicitors. Pay-as-you-go fixed-fee.	They're the destination, we're the entry-point. Complementary, not competitive — could partner.
LegalZoom UK	Document templates, will-writing.	Templates are static. We answer specific factual questions, draft bespoke letters, analyse evidence.
Citizens Advice	Charity, free, generic advice via website/phone queue.	Free, but capacity-limited (~3 week phone queue in 2025). We're instant + multilingual + 24/7.
Harvey AI	Enterprise legal AI for big law firms (PwC, A&O;).	B2B-only, top of market (£100k+ contracts). Different segment entirely.
ChatGPT (free)	General-purpose AI; users ask it legal questions.	Hallucinates UK case law. No source citation. No directory of regulated solicitors. No emergency mode. No vault.

Our defensible moats

- **UK-jurisdiction depth** — none of the US competitors will retro-fit proper Scots-law / NI-law / EW-statute grounding without ground-up rework.
- **Firm-referral pipeline** — once we have a stable directory of regulated firms, network effects kick in (more firms = better matching = more users = more firms).
- **Voice + 11 languages** — uniquely accessible to digitally-marginalised UK adults. Hard to replicate without ground-up multi-language design.
- **Emergency mode** — only legal app on the market with one-tap SOS + live location + family alerts. Differentiator + viral story-hook.
- **£49 Solicitor Sanity Check** — human-in-the-loop SRA-regulated review on demand. The only consumer legal app that puts a real solicitor in the loop for under £50. This is our single strongest differentiator against US chatbots and the strongest UPL defence.
- **Predict Outcome + Devil's Advocate** — case-strength estimation against UK precedent + opposing-counsel simulation. Categorically beyond ChatGPT/Claude consumer responses.
- **ICO + insurance + signed disclaimers** — high compliance bar deters fast-followers without legal expertise.

Sector partnership pipeline (prospective)

Status: no partnerships are currently signed or live. The table below is our prospective outreach pipeline, not a list of active partners. We are preparing coordinated cold-outreach to the five largest UK advice-sector organisations. Each pitch positions AI Advocate as a free pre-triage layer that deflects first-pass questions from their queues, returns warm leads to us, and donates revenue back to them. The proposed structure for each is identical: co-branded landing page → 7-day free Pro trial for referred users (no card required) → standard subscription pricing thereafter → **10% of net subscription revenue from converting referrals donated back as unrestricted charitable income**, in perpetuity. Each partnership would be contractually documented (per-charity MoU); we have not made first contact at the time of writing.

Target organisation	Annual reach	Why we expect them to engage
Citizens Advice	2.5M cases/yr · ~28k staff	Queue at 3-week wait. Free triage tool + £150k+/yr potential charitable income at scale.
Shelter	1M enquiries/yr	Housing law is Lex's sweet spot — Letter Reader was built for section 21s, possession claims, deposit disputes.
StepChange	600k callers/yr	'What happens if I do nothing?' simulator is uniquely valuable for debt callers (CCJ, bailiff, charging-orders).
AdviceUK	700 member centres · 2.5M cases/yr collectively	Highest leverage — one yes opens 700 doors. Small central team = faster decision.
Turn2us	1.5M users/yr	Free tier + 11 languages aligned with their vulnerable demographic. Specific fit for DWP appeals / mandatory reconsiderations.

Tough questions cheat-sheet

"How will you survive Anthropic raising prices 3×?"	Multi-vendor strategy — we route across Claude, GPT-5.2, and Gemini. We can absorb a 3× hike on any one provider by routing volume to the cheapest at any moment. Our cost-per-active-user is ~£0.80/mo today.
"What's your CAC vs LTV?"	Pre-launch — modelling. Waitlist signups have a 12% free-to-paid conversion target. Plus tier LTV at £19.99 × 14 months retention = £280. CAC target sub-£40 via organic + content + firm-referrals (free).
"Why won't Google/Apple just build this?"	Google has Gemini and zero appetite for regulated jurisdictions. Apple won't touch legal advice. Big-tech avoids high-liability UK regulated verticals. We're protected by the moat of caring.
"What stops a 16-year-old using this for a serious case?"	Hard 18+ age-gate at sign-up. UK law-of-contract enforces minor protection separately. We refer minors to Childline / NSPCC where appropriate.
"What happens if the AI gives wrong info and someone loses £100k?"	Liability is capped to £50 or 3 months' fees per our Terms (v1.4.1, cl.8). Professional indemnity cover is being arranged for the launch window. Critically — Lex always says 'verify with a qualified solicitor' for anything material. We're a triage, not a substitute.
